### **ABSTRACT**

#### **PROBLEM STATEMENT:**

The end of 2019 witnessed the outbreak of Corona virus Disease (COVID-19), which has continued to be the cause of plight for several businesses even in 2021. As the world recovers from the pandemic and plans to return to a state of normalcy, there is a wave of anxiety among all individuals, especially those who intend to resume in-person activity. All the large-scale businesses found it much easier to recover from the pandemic when compared to small-scale businesses and startups. Technology holds the key here to improve these businesses. So, any shop or organisation which is in need to scale up its business to get past the losses incurred due to the pandemic could venture into E-commerce by acquiring this software.
